NAME

ALTER_LARGE_OBJECT − change the definition of a large object

SYNOPSIS

ALTER LARGE OBJECT *large_object_oid* OWNER TO { *new_owner* | CURRENT_ROLE | CURRENT_USER | SESSION_

DESCRIPTION

ALTER LARGE OBJECT changes the definition of a large object.

You must own the large object to use **ALTER LARGE OBJECT**. To alter the owner, you must also be able to SET ROLE to the new owning role. (However, a superuser can alter any large object anyway.) Currently, the only functionality is to assign a new owner, so both restrictions always apply.

PARAMETERS

large_object_oid

OID of the large object to be altered

new_owner

The new owner of the large object

COMPATIBILITY

There is no **ALTER LARGE OBJECT** statement in the SQL standard.
