

NAME

afNewFileSetup – create and initialize a new AFfilesetup structure

SYNOPSIS

```
#include <audiofile.h>
```

```
AFfilesetup afNewFileSetup(void);
```

RETURN VALUE

afNewFileSetup returns, upon success, a valid AFfilesetup structure.

Upon failure, afNewFileSetup returns a null AFfilesetup. This case should only occur when no memory is available.

DESCRIPTION

The opaque AFfilesetup structure returned by afNewFileSetup can be used to specify parameters for a file to be opened for writing by **afOpenFile(3)**.

SEE ALSO

afOpenFile(3)
