

NAME

audit_add_watch – create a rule layout for a watch

SYNOPSIS

```
#include <libaudit.h>
```

```
int audit_add_watch(struct audit_rule_data **rulep, const char *path);"
```

DESCRIPTION

audit_add_watch will create a watch rule in the pointer to a pointer *rulep*. All that you need to pass it is the full *path* to a file and it will initialize the audit_rule_data structure for a watch.

RETURN VALUE

Returns -1 if an error occurs; otherwise, 0 for success.

SEE ALSO

audit_add_rule_data(3), audit_delete_rule_data(3).
