NAME

audit_delete_rule_data − Delete audit rule

SYNOPSIS

#include <libaudit.h>

int audit_delete_rule_data(int *fd***, struct audit_rule_data ****rule***, int** *fla gs***, int** *action***);"**

DESCRIPTION

audit_delete_rule_data is used to delete rules that are currently loaded in the kernel. The file descriptor is given in *fd* and the rule description in *rule*. To delete a rule, you must set up the rules identical to the one being deleted. See audit_add_rule_data for *flags* and *action* definitions.

RETURN VALUE

The return value is <= 0 on error, otherwise it is the netlink sequence id number. This function can have any error that sendto would encounter.

SEE ALSO

audit_add_rule_data(3), **auditctl**(8).
