

NAME

audit_request_features – request audit feature bitmap

SYNOPSIS

```
#include <libaudit.h>
```

```
int audit_request_features(int fd);
```

DESCRIPTION

audit_request_features() requests that the kernel send a structure describing supported audit features on *fd* which must be an open audit netlink socket.

RETURN VALUE

The return value is ≤ 0 on error, otherwise it is the netlink sequence id number. This function can have any error that **sendto(2)** would encounter.

SEE ALSO

audit_get_features(3), **audit_open(3)**, **auditd(8)**.
