

NAME

audit_request_rules_list_data – Request list of current audit rules

SYNOPSIS

```
#include <libaudit.h>
```

```
int audit_request_rules_list_data(int fd);"
```

DESCRIPTION

audit_request_rules_list_data sends a request to the kernel to list the current audit rules. The rules are sent back one after another after this request is issued.

RETURN VALUE

The return value is ≤ 0 on error, otherwise it is the netlink sequence id number. This function can have any error that sendto would encounter.
