

NAME

aulastlog – a program similar to lastlog

SYNOPSIS

aulastlog [options]

DESCRIPTION

aulastlog is a program that prints out the last login for all users of the **local** machine similar to the way lastlog does. The login-name, port, and last login time will be printed.

If the user has never logged in, the message **** Never logged in**** will be displayed instead of the port and time.

OPTIONS

-u, --user

Print the lastlog record for user with specified LOGIN only.

--stdin

Use stdin as the source of audit records. The audit events must be in the raw format.

SEE ALSO

lastlog(8), **ausearch(8)**, **aureport(8)**.
