

NAME

auparse_get_milli – get the millisecond value of the event

SYNOPSIS

```
#include <auparse.h>
```

```
unsigned int auparse_get_milli(const auparse_state_t *au);"
```

DESCRIPTION

auparse_get_milli gets the millisecond value of the current event.

RETURN VALUE

Returns 0 if an error occurs; otherwise, the value of the millisecond portion of the timestamp.
