

NAME

auparse_get_time – get event's time

SYNOPSIS

```
#include <auparse.h>
```

```
time_t auparse_get_time(const auparse_state_t *au);"
```

DESCRIPTION

auparse_get_time will access just the time portion of the timestamp data structure for the current event.

RETURN VALUE

Returns 0 if an error occurs; otherwise, the valid time value in time_t format.

SEE ALSO

time(3), auparse_get_timestamp(3), auparse_get_milli(3), auparse_get_serial(3), auparse_get_node(3).
