

NAME

capng_clear – clear chosen capabilities set

SYNOPSIS

```
#include <cap-ng.h>
```

```
void capng_clear(capng_select_t set);
```

DESCRIPTION

capng_clear sets to 0 all bits in the selected POSIX capabilities set. The options are CAPNG_SELECT_CAPS for the traditional capabilities, CAPNG_SELECT_BOUNDS for the bounding set, CAPNG_SELECT_BOTH if clearing both is desired, CAPNG_SELECT_AMBIENT if only operating on the ambient capabilities, or CAPNG_SELECT_ALL if clearing all is desired.

RETURN VALUE

None.
