

NAME

clamav-milter – milter compatible mail scanner

SYNOPSIS

clamav-milter [options]

DESCRIPTION

Clamav-milter is a filter for **sendmail(1)** mail server. It uses a mail scanning engine built into **clamd(8)**.

Clamav-milter can use load balancing and fault tolerant techniques to connect to more than one clamd(8) server and seamlessly hot-swap to even the load between different machines and to keep scanning for viruses even when a server goes down.

OPTIONS

-h, --help

Output help information and exit.

-V, --version

Print the version number and exit.

-c FILE, --config-file=FILE

Read configuration from FILE.

FILES

/etc/clamav/clamav-milter.conf

AUTHOR

aCaB <acab@clamav.net>
