

NAME

curl_url_cleanup – free the URL handle

SYNOPSIS

```
#include <curl/curl.h>
```

```
void curl_url_cleanup(CURLU *handle);
```

DESCRIPTION

Frees all the resources associated with the given *CURLU* handle.

Passing in a NULL pointer in *handle* makes this function return immediately with no action.

Any use of the **handle** after this function has been called and have returned, is illegal.

PROTOCOLS

This functionality affects all supported protocols

EXAMPLE

```
int main(void)
{
    CURLU *url = curl_url();
    curl_url_set(url, CURLUPART_URL, "https://example.com", 0);
    curl_url_cleanup(url);
}
```

AVAILABILITY

Added in curl 7.62.0

RETURN VALUE

none
