

NAME

debuginfod.service – debuginfo related information server for systemd

SYNOPSIS

/usr/lib/systemd/system/debuginfod.service

DESCRIPTION

debuginfod.service integrates the debuginfod daemon with systemd, serving debuginfo-related artifacts over HTTP. The data is stored in /var/cache/debuginfod/debuginfod.sqlite. Configure /etc/sysconfig/debuginfod to set the below environment variables as well as those listed in **debuginfod(8)**.

Environment variables

\$DEBUGINFOD_PORT - Changes port of **debuginfod** service daemon.

\$DEBUGINFOD_VERBOSE - Change verbosity of reporting in **debuginfod** service daemon log file.

\$DEBUGINFOD_PATHS - Changes paths to scan for **debuginfod** service daemon.

FILES

/usr/lib/systemd/system/debuginfod.service, /var/cache/debuginfod/debuginfod.sqlite /etc/sysconfig/debuginfod
