

NAME

`decode-vaio` – decode the information found in the Sony Vaio laptop identification EEPROMs

SYNOPSIS

`decode-vaio`

DESCRIPTION

The purpose of the **`decode-vaio`** tool is to decode the information found in the Sony Vaio laptop identification EEPROMs. The tool requires the `eeeprom` kernel module to be loaded.

BUGS

To report bugs or send fixes, please write to the Linux I2C mailing list <linux-i2c@vger.kernel.org> with Cc to the current maintainer: Jean Delvare <jdelvare@suse.de>.
