

NAME

docker-load - Load an image from a tar archive or STDIN

SYNOPSIS

docker load [OPTIONS]

DESCRIPTION

Alias for **docker image load**.

OPTIONS

-i, --input="" Read from tar archive file, instead of STDIN

--platform=[] Load only the given platform(s). Formatted as a comma-separated list of "os[/arch[/variant]]" (e.g., "linux/amd64,linux/arm64/v8").

-q, --quiet[=false] Suppress the load output
