

NAME

docker-plugin-ls - List plugins

SYNOPSIS

docker plugin ls [OPTIONS]

DESCRIPTION

Lists all the plugins that are currently installed. You can install plugins using the **docker plugin install** command. You can also filter using the **-f** or **--filter** flag.

Filters

Filter output based on these conditions:

- enabled=(true|false) - plugins that are enabled or not
- capability= - filters plugins based on capabilities (currently **volumedriver**, **networkdriver**, **ipamdriver**, or **authz**)

Format

Format the output using the given Go template.

Valid placeholders:

- .ID - Plugin ID.
- .Name - Plugin Name.
- .Description - Plugin description.
- .Enabled - Whether plugin is enabled or not.

EXAMPLES**Display all plugins**

```
$ docker plugin ls
```

ID	NAME	DESCRIPTION
869080b57404	tiborvass/sample-volume-plugin:latest	A sample volume plugin for Docker
141bf6c02ddd	vieux/sshfs:latest	sshFS plugin for Docker

Display plugins with their ID and names

```
$ docker plugin ls --format "{{.ID}}: {{.Name}}"
869080b57404: tiborvass/sample-volume-plugin:latest
```

Display plugins in JSON format

```
$ docker plugin ls --format json
{"Description":"A sample volume plugin for Docker","Enabled":true,"ID":"2788a2da7e12"}
```

Display enabled plugins

```
$ docker plugin ls --filter enabled=true
```

ID	NAME	DESCRIPTION
869080b57404	tiborvass/sample-volume-plugin:latest	A sample volume plugin for Docker

Display plugins with volumedriver capability

```
$ docker plugin ls --filter capability=volumedriver --format "table {{.ID}}\t{{.Name}}\t{{.Description}}\n"
table
ID      Name                               Description
869080b57404  tiborvass/sample-volume-plugin:latest  A sample volume plugin for Docker
```

OPTIONS

-f, --filter= Provide filter values (e.g. "enabled=true")

--format="" Format output using a custom template: 'table': Print output in table format with column headers (default) 'table TEMPLATE': Print output in table format using the given Go template 'json': Print in JSON format 'TEMPLATE': Print output using the given Go template. Refer to <https://docs.docker.com/go/formatting/> for more information about formatting output with templates

--no-trunc[=false] Don't truncate output

-q, --quiet[=false] Only display plugin IDs
