

NAME

ecryptfs-add-passphrase – add an eCryptfs mount passphrase to the kernel keyring.

SYNOPSIS

ecryptfs-add-passphrase [--fnek]

printf "%s" "passphrase" | **ecryptfs-add-passphrase** [--fnek] -

DESCRIPTION

ecryptfs-add-passphrase is a utility to manually add a passphrase to the kernel keyring.

If the --fnek option is specified, the filename encryption key associated with the input passphrase will also be added to the keyring.
