

NAME

eread – Gentoo: Tool to display and manage ELOG files from portage

SYNTAX

eread

DESCRIPTION

This tool is used to display and manage ELOG files produced by portage version 2.1 and higher.

USAGE

You can use the following commands:

- q** Quit
- a** Sort alphabetically
- t** Sort by time

ENVIRONMENT VARIABLES

The eread utility uses the `PAGER` environment variable to display the ELOG files. If the variable is not set, it defaults to `/usr/bin/less`. Another environment variable is `EREAD_SORT_ORDER` which can be set to specify default sort order of ELOG files. Values **alphabet** and **time** are recognized. If `EREAD_SORT_ORDER` is not set or has another value, the output is unsorted.
