

NAME

ares_library_initialized – get the initialization state

SYNOPSIS

```
#include <ares.h>
```

```
int ares_library_initialized(void)
```

DESCRIPTION

Returns information if c-ares needs to get initialized.

RETURN VALUE

ARES_ENOTINITIALIZED if not initialized and *ARES_SUCCESS* if no initialization is needed.

AVAILABILITY

This function was first introduced in c-ares version 1.11.0
