

NAME

data_ahead, **data_behind** – test for off-screen data in given forms

SYNOPSIS

```
#include <form.h>
```

```
bool data_ahead(const FORM *form);
```

```
bool data_behind(const FORM *form);
```

DESCRIPTION

The function **data_ahead** tests whether there is off-screen data ahead in the given form. It returns TRUE (1) or FALSE (0).

The function **data_behind** tests whether there is off-screen data behind in the given form. It returns TRUE (1) or FALSE (0).

PORTABILITY

These routines emulate the System V forms library. They were not supported on Version 7 or BSD versions.

AUTHORS

Juergen Pfeifer. Manual pages and adaptation for new curses by Eric S. Raymond.
