

NAME

afSetErrorHandler – install a custom error handling routine

SYNOPSIS

```
#include <audiofile.h>
```

```
AFerrfunc afSetErrorHandler (AFerrfunc errorFunction);
```

PARAMETERS

errorFunction is a pointer to an error handling function.

DESCRIPTION

afSetErrorHandler allows the user to install an error handling function overriding the default function.

RETURN VALUE

The value returned from afSetErrorHandler is a pointer to the previous error handling function.
