

NAME

capng_have_capability – check for specific capability

SYNOPSIS

```
#include <cap-ng.h>
```

```
int capng_have_capability(capng_type_t which, unsigned int capability);
```

DESCRIPTION

capng_have_capability will check the specified internal capabilities set to see if the specified capability is set. The capabilities sets must be previously setup with calls to capng_get_caps_process, capng_get_caps_fd, or in some other way setup. The values for which should be one of: CAPNG_EFFECTIVE, CAPNG_PERMITTED, CAPNG_INHERITABLE, CAPNG_BOUNDING_SET, or CAPNG_AMBIENT.

RETURN VALUE

This function will return 1 if yes and 0 otherwise.
