

NAME

delpart – tell the kernel to forget about a partition

SYNOPSIS

delpart *device partition*

DESCRIPTION

delpart asks the Linux kernel to forget about the specified *partition* (a number) on the specified *device*. The command is a simple wrapper around the "del partition" ioctl.

This command doesn't manipulate partitions on a block device.

OPTIONS

-h, --help

Display help text and exit.

-V, --version

Display version and exit.

SEE ALSO

addpart(8), fdisk(8), parted(8), partprobe(8), partx(8)

REPORTING BUGS

For bug reports, use the issue tracker <<https://github.com/util-linux/util-linux/issues>>.

AVAILABILITY

The **delpart** command is part of the util-linux package which can be downloaded from Linux Kernel Archive <<https://www.kernel.org/pub/linux/utils/util-linux/>>.
